MARCUS MAHLATJIE

SOFTWARE ENGINEERING STUDENT

PERSONAL STATEMENT

I am a quality driven third year software engineering student with a passion for developing innovative solutions to new problems. I'm very eager to learn and very hands on, ready to contribute within a collaborative team environment while gaining hands-on experience. Throughout my studies I took part in various hackathons and international projects which helped me develop wider interpersonal skills and abilities in communication, collaboration, and flexibility. I was also the captain of the varsity football team in my first and second year where I was able to learn the true values of leadership, responsibility, and integrity.
